PROFESSIONAL SUMMARY

Detail-oriented Computer Science Engineering student with a specialization in bridging the gap between complex system architecture and intuitive UI/UX. Expert in Figma and React.js, with a proven track record of engineering "pixel-perfect" digital products and modular design systems. Passionate about AI-Native design, focusing on how machine learning can enhance user decision-making and cognitive hospitality

EDUCATION

KPR Institute of Engineering and Technology – Coimbatore, India

Sep 2023 - Present

- B.E. in Computer Science and Engineering | CGPA: 8.55

Einsstein Matric Higher Secondary School - Namakkal, India

Jun 2021 - Apr 2023

- Higher Secondary Education | Percentage: 92%
-

SKILLS

- Design Tools: Figma , Canva, Stitch ,Pomelli , Affinity , Adobe Express.
 - Web Development: UI/UX , React.js, JavaScript, HTML5, CSS3, Framer
 - Languages: Java , Python , JavaScript , SQL
 - Data Analytics: Microsoft Power BI , Microsoft Excel
 - Creative Thinking , Human Psychology.
-

PROJECTS

AI-Native Engineering Portfolio | [Link](#)

- Architected a high-performance responsive portfolio using React.js and Tailwind CSS. Designed to showcase the integration of modular system logic with modern UI aesthetics. Implemented a custom filtering engine and motion-enhanced navigation to demonstrate technical precision.

Cognitive Modal – Visual Storytelling Concept | [Link](#)

- Engineered a high-impact static experience exploring bold visual hierarchy and intentional typography. Developed a modal-driven interaction flow focused on lightweight performance and intuitive scanability. Optimized responsive behavior to maintain layout rhythm across diverse device scales.

GreenCart – Brand Storefront | [Link](#)

- Engineered a high-performance commerce experience from scratch, prioritizing pixel-perfect UI/UX and fluid state management. Developed a modular architecture that eliminates navigation latency, ensuring a premium brand experience that remains consistent across all device scales.

CarRental – Dynamic Service | [Link](#)

- Mastered the complexity of dynamic resource allocation by building a robust search-to-reservation pipeline. Implemented advanced filtering logic to process complex parameters like pricing and availability in real-time, delivering a high-utility service platform with zero friction.
-

CERTIFICATIONS

- Design & User Experience: Mastered 'UI/UX Design' (Great Learning) & 'HTML' (Programiz), focusing on the intersection of brand aesthetics and technical usability.
- Full-Stack & System Design: Specialized in end-to-end application architecture through 'Full Stack Development' (GreatStack) and 'React.js' (ExcelR).
- Enterprise Logic & Backend: Validated proficiency in backend engineering with 'Java' (HackerRank) and 'Python' (Infosys SpringBoard).
